

6.2 List of affiliated public/ university Hospitals for the clinical training of the students

The clinical training for students takes place at the University General Hospital of Patras, which is adequately staffed and fully equipped for such a process. According to the department's internal regulation: "Exceptionally and for particularly serious reasons, the clinical training of the 5th and 6th years of the study program may be allowed outside the University General Hospital of Patras, in another University Hospital in the country, only," without being limited to a specific list. Students choose and register the hospital of their choice that meets the above criteria in their application to the department assembly, where they express their desire to carry out their clinical training. In addition, students have the opportunity to participate in the Erasmus+ program, which includes mobility for studies (at Higher Education Institutions) and mobility for internships (at Higher Education Institutions, Businesses, Schools, Institutes, Embassies, Hospitals, Research Centers, etc.), in countries participating in the program.
